

Active Braille

The ultimate 40-cell Braille display with notetaker function and multi-Bluetooth

The Active Braille is a 40-cell Braille display and the consistent further development of the proven Active Braille. It is even more compact, ergonomically optimized with improved controls and even more functionality. The Active Braille is the ideal combination for laptop, PC and smartphone. Not only as a Braille display but also as a powerful organizer, the Active Braille convinces with space for hundreds of books (64 GB storage), an ergonomic and very quiet Braille keyboard, control key, joystick and vibration signals. Enjoy pure reading pleasure by automatically scrolling via patented ATC technology. With multi-Bluetooth and a battery life of approx.

- 40 concave braille cells with cursor routing
- adjustable Braille pin strength
- Braille keyboard, ergonomic & very quiet
- Patented ATC technology recognizes the reading position
- integrated organizer functions like editor, calculator, scheduler, etc.
- control key (Ctrl key)
- Multi-Bluetooth for Braille and sound with three devices simultaneously
- audio pairing with iPhone
- MP3 player, high quality stereo speakers
- vibration signals
- 64 GB memory, mass storage
- rechargeable battery life up to 40 hours

Active Braille

The ideal mobile Braille display

The Active Braille is directly usable thanks to HID technology and is immediately recognized by all screen readers e.g. JAWS, NVDA, VoiceOver. Connected via USB C, the Active Braille is controlled and charged.

Multi Bluetooth

In addition to the USB-C connection, multi-Bluetooth allows wireless connection of 3 additional smart devices for Braille and audio.

The pure reading pleasure

Hundreds of books (64 GB) can be read effortlessly with the patented ATC technology. No more annoying scrolling, just pure Braille reading pleasure. With 40 hours of battery life, the Active Braille is ideal for on the go or comfortable on the sofa.

Organizer ToGo

Open the carrying case, switch on and off you go. Instantly, without waiting time you can make notes even while standing. The Active Braille offers comfortable notetaker functionality and many features of an organizer like scheduler, clock, alarm clock, player and MusikBraille via polyphonic sound chip.

The notes - whether in school, at university or work - can be easily transferred. Just paste them directly into an email or WhatsApp and send them off.

Active Braille

The control center

The additional space bar, centered between the Braille keys, can be used to enter direct control commands to the computer. The Ctrl key interrupts the speech output, for example. Even starting the screen reader is possible this way. e.g. Chord j+7+8 to start JAWS (Shift + Alt + J).

The additional space bar is especially well placed for small hands, making it easier to type notes.

Discrete vibration signals

Using left/right combinations of vibrations, the Active Braille discreetly emits signals via two vibrators. With super-quiet braille keys and braille modules combined with vibration signals, the Active Braille is ideal in the classroom or at meetings. The vibration signals can also be combined with sound signals.

Sound output with MP3 player

Music, audio books or audio descriptions are played by Active Braille through high-quality stereo speakers. Entire playlists can be played while taking notes. Playback of audio books can even be done in double or triple speed.

Technical Data

Input / Output

- 40 concave piezoceramic braille cells with cursor routing
- 8 function keys/braille input keys
- 3 space keys
- Active Tactile Control (ATC) technology
- Vibration signals
- Polyphonic sound output
- MP3 audio player
- Stereo loudspeaker
- Microphone

Navigation / Controls

- 2 triple action buttons
- 5-way joystick
- Control key (Ctrl key)

Connectors / interfaces

- 1 USB type C (for PC or charger)
- 2 USB type A (keyboard port)
- 1 Headphone jack 3.5 mm
- Wireless Multi Bluetooth technology

Memory

- 64 GB micro SD card
- Mass storage

Rechargeable batteries

- Lithium-ion battery 5000 mAh
- USB and battery power
- Battery life: 40 hrs
- Quick charge time: 3 hrs

Dimensions and weight

- Dimensions (W x D x H): 31.9 x 11.4 x 2.2 cm (12,5" x 4,5" x 0,866")
- Weight: 820 g (1,64 lb)
